

Project Title	One Stop Inspection Station
Desired Results	Reduced Transit time and cost from Dar Port to Kigali or Bujumbura
Implementing Partner	CCTTFA
Target Group	Tanzania Revenue Authority, Police, TANROADS and Transporters along the Central Corridor.
Value (In US\$)	300,000
Implementation period	July 2011 – December 2019
Why?	Traffic along the central corridor is stopped for about 55 times before reaching the destination (8 weighbridges, 44 Police checks and 3 revenue checks) and this causes significant delays and relatively high transportation cost.
What?	<p>Establishment of One stop inspection stations (OSIS) along the central corridor, specifically at Manyoni and Nyakanazi aiming at reducing transit cost and facilitate trade. The stations will house all transport regulatory agencies in the transport sub-sector (TRA, Police, TANROADS, and standards regulatory bodies) in the view to conducting their respective regulatory roles once at every station, at a time.</p> <p>One Stop Inspection Station is being constructed at Manyoni and Nyakanazi. Key Outputs:</p> <ul style="list-style-type: none"> ▪ Increased Efficiency of the regulatory authorities ▪ Reduction of transport cost ▪ Reduction of transit time
How?	TMEA is providing fund for Feasibility study, design work and supervision of construction works.
