Implementing Partner Tanzania Bureau of Standards and SPS in Tanzania Implementing Partner Tanzania Bureau of Standards (TBS) for phase 1; TBS, Ministry of Industry and Trade, Ministry of Agriculture, and Ministry of Livestock and Fisheries for phase 2 Target Group Micro, Small and Medium Enterprises (MSMEs), Standard and Quality Infrastructure Institutions, and Importers and Exporters in Tanzania 15,950,000 Implementation period Why? The existing standards frameworks in Tanzania, which is overseen by TBS, faces challenges of policy, administrative, regulatory and enforcement nature. These challenges have hampered TBS's capability to offer quality service to its stakeholders, develop market oriented standards, and foster the uptake and adoption of standards by the business community. Further, challenges related to SPS constrain trade growth, especially access to international markets for Tanzania products What? Tanzania Bureau of Standards (TBS) with the support of TradeMark East Africa (TMEA) is embarking on a process of improving its service delivery mechanisms to its stakeholders in Tanzania. Part of this improvement includes capacity building and boosting of operational efficiency initiatives targeting its internal and external stakeholders. Key expected results include; Increased Efficiency in the Administration of Standards Licensing and Inspections Improved National Quality Infrastructure Regulatory Regime (NQIRR) Improved Capacity to Deliver Services Consistent with Regional and International Standards. On the second phase of the programme, TMEA is supporting the bureau of standards MLF, MIT, and MOA to improve SPS frameworks, with a target of; Increasing Tanzania's exports of agricultural products: To increase capacity of conducting SPS inspections for agricultural exports by the Ministry of Agriculture and Ministry of Livestock and Fisheries, which will reduce the rates of rejects. Further, to increase complaince of private sectors of undersided and SPS requirements, to uplift their participatio	Project Title	Standards, Quality Infrastructure, and SPS programme

certification (on standards and SPS) to increase their scope of exports, and to access new markets and develop new products. • Ratification of the EAC SPS protocol by the Government of Tanzania:		and SPS agencies: To build capacity of the private sectors to support
		 certification (on standards and SPS) to increase their scope of exports, and to access new markets and develop new products. Ratification of the EAC SPS protocol by the Government of Tanzania:

Average time and cost to test and issue certificate of conformity in Tanzania: supporting best practises in standardization and SPS testing, inspection and enforcement.
 Increase compliance to SPS/Technical regulations for re-engineering or process improvement so that the offered services are optimized to be efficient.
 How?
 The project assisted TBS in the development of a training program on Standards, targeting MSMEs using conventional training methods suitable

The project assisted TBS in the development of a training program on Standards, targeting MSMEs using conventional training methods suitable for businesses - using both analogue and digital platforms. It also supported TBS on the development of an integrated Standards, Quality, Metrology and Testing (iSQMT) system that automates the key administrative processes used by TBS to offer services to its stakeholders; Development of National Quality Policy Framework to establish guidelines and procedures in the development, administration, regulation and enforcement of standards in Tanzania; and development of a standards harmonization and accreditation program to support TBS to domesticate regionally harmonized standards and also have their systems, processes and service delivery processes accredited.

The second phase will include both Standards and SPS by;

- i. Adoption and ratification of regional and international agreements and protocols in this case, Tanzania will be supported through the ratification process;
- ii. Development and domestication of regionally harmonized Standards, and SPS regulations;
- iii. Enhancement of standards and SPSs conformity assessment infrastructure;
- iv. Strengthening of the SPS framework for market access;
- v. Implementation of the National Quality Infrastructure;
- vi. Improvement of National Notification Authorities and inquiry points for standards and SPS;
- vii. Establishment of National Standards and SPSs Centres of Excellence; and
- viii. Capacity building for the private sector, to improve uptake and usage of adopted standards and SPS regulations.
