| Project Title | Djibouti Chamber of Commerce e-Certification |
|---|---|
| Desired Results | Improved Efficiency and Capacity of Djibouti Corridor |
| Implementing Partner | Djibouti Chamber of Commerce |
| Target Group | Exporters, Transporters |
| Value (In US$) | 200,000 |
| Implementation period | Jan 2022- Dec 2025 |
| Why? | Djibouti Chamber of commerce currently issues preferential/ordinary manual Certificates of Origin, which consumes more time and resources. This project seeks to automate the processes by developing an online platform for application, approval and issuance of certificates of origin as well as develop a data base for managing membership for the Djibouti Chamber of Commerce. |
| How? | The platform will have three main modules: Application of Certificate of Origin, Approval and issuance of Certificate of Origin and Customer Relations Module. The three main modules will be supported by the following other modules: Online Registration of Members, Online/Mobile Payment of Services and Reporting Module.<br>This platform will facilitate a reduction in cost and time for application, approval, and issuance of Certificates of Origin to the members of the Chamber. It will also enhance information sharing between the National Chamber, its partner offices as well as its members who are the greatest asset of the Chamber. |
