TECHNICAL ASSISTANCE TO SUPPORT IMPLEMENTATION OF STANDARDS AND SANITARY AND PHYTOSANITARY MEASURES INTERVENTIONS FOR KENYA'S FRUITS AND VEGETABLES - PHASE 2

1. BACKGROUND

a. About TradeMark Africa

TradeMark Africa (TMA) is a leading African Aid-for-Trade organisation founded in 2010, with the mission to grow intra-African trade and increase Africa's share in global trade, while helping make trade more pro-poor and environmentally sustainable. TMA operates on a not-for-profit basis and is funded by: the Bill and Melinda Gates Foundation, Canada, Denmark, the European Union, Finland, France, Ireland, the Mastercard Foundation, the Netherlands, Norway, the United Kingdom, and the United States of America. TMA works closely with regional and continental organisations, national Governments, the private sector, and civil society.

Since its inception, TMA has delivered substantial gains for trade and regional economic integration in East Africa and the Horn of Africa, including a reduction of 16.5% in cargo transit times on the Northern Corridor from Mombasa to Bujumbura, and a reduction of an average of 70% in the time taken to cross selected one stop border posts. TMA works in 14 countries across East and West Africa, Southern Africa, and the Horn.

In 2022, TMA set up a catalytic finance company – Trade Catalyst Africa – that will pilot commercially viable projects for creating trade infrastructure (both physical and digital) as well as increasing access to Trade Finance for Small and Medium Enterprises (SMEs). Both TCA's and TMA's headquarters are in Nairobi, Kenya. Offices are in: EAC (East Africa Community) Secretariat - Arusha, Burundi, the Democratic Republic of Congo, Djibouti, Ethiopia, Ghana, Malawi, Rwanda, Somaliland, Tanzania, and Uganda, with operations in Mozambique, South Sudan, and Zambia.

TMA continues to leverage its core expertise in trade facilitation, physical connectivity and development of quality infrastructure and sanitary and phytosanitary (SPS) systems while harnessing the potential of digitalization, support African exporters to pioneer low carbon trade, address the core trade factors behind food security and promote inclusive trade. By increasing trade volumes, and enhancing the sustainability and inclusiveness of trade, we aim to deliver large-scale job creation, poverty reduction and enhanced economic growth.

b. About the Kenya Business Environment and Export Enhancement Programme (BEEEP)

Business Environment and Export Enhancement Programme (BEEEP) is a unique export-oriented value chain ecosystem that will address challenges in the **mangos, avocados and vegetables value chains** to enhance competitiveness and increase access to identified export markets. The value chains were identified based on a sector selection study by Kenya's Department for Business Reforms and Transformations that concluded that these value chains have the strongest potential to boost exports, value addition and job creation. Reaching this potential will require focused interventions that will result in increasing trade and improve Kenya's economy in terms of jobs creation and improved incomes particularly in the targeted geographic areas. BEEEP will therefore partner with the government of Kenya trade agencies and select private sector players, buyers, and producers to deliver the following three objectives:

1. **Increased and diversified trade in mangos, avocados and vegetables value chains.** Partners will increase capacity of stakeholders to conceptualize, market and capitalize on trade and investment opportunities; Increased access to finance; Improve public and private sector coordination in addressing binding constraints to export enhancement and diversification and increase demand of Kenya's export by enhancing export promotion initiatives. Some of the envisioned gains include a one-stop digital platform for Kenya's products and marketing campaigns targeting exporters and buyers to position Kenya's products.
2. **Reduced trading times and costs by improving** efficiency and environmental sustainability of transport infrastructure at Mombasa port, Nairobi ICD, Naivasha ICD and part of this will include provision of reefer panels to provide reliable power supply for cold storage and refrigeration of containers in support of a modal shift from airfreight to sea freight for fresh produce. The reefer panels will be useful for maintaining cold temperatures for refrigerated containers. As we anticipate a 50% increase in shipping of horticulture through the port of Mombasa by 2030, part of the programme will work with Kenya Ports Authority to improve capacity of Mombasa port to handle fresh produce to increase shifts from air freight to sea freight for horticulture exports. Additionally, working with bureaus of standards to improve quality infrastructure related to standards and conformity procedures, and facilitating development, amendment or implementation of necessary laws and trade agreements that will improve trade regulatory environment for the three value chains. Such include but not limited to strengthening capacities for pest and food safety monitoring.
3. **Enhanced business climate by improving** capacity of Kenya's Department for Business Reforms and Transformations to develop, coordinate and implement business reforms related to ease of doing business at national and sub-national levels.

The BEEEP programme proposes to address quality and SPS challenges in Kenya's horticultural sector through interventions in the public and private sector in order to open and expand markets for Kenya's fruits and vegetables. Some of the challenges include: rejections and interceptions due to presence of harmful organisms and exceedance of maximum pesticide residue levels, an ineffective and inefficient risk assessment management system, weak technical capabilities of national Standards and SPS Competent Authorities, and weak interaction with private sector in safeguarding public health and ensuring market access. To address this challenges and fully exploit regional and international markets for Kenya's fruits and vegetables, there is an increased need to ensure compliance to product quality and safety requirements and standards necessary for trade. Enhanced compliance results in better access, particularly by small producers, to domestic and international markets means that they can reliably sell more produce at higher prices. This in turn encourages farmers to invest in their own businesses and increase the quantity and quality of the goods they produce and supply and seize emerging opportunities for promoting agribusiness in the new global context is, therefore, imperative for prosperity and economic development of Kenya horticultural industry.

The programme intends to scale up interventions that were implemented in the first phase of implementation. Milestones achieved include assessment of existing Voluntary Sustainability Standards in Kenya's horticulture sector, assessment of awareness of KS1758 standards and recommendations to improve awareness and compliance of the standards; validated comprehensive communication and visibility strategy for KS1758 standards; training of TOTs on GlobalG.A.P., SPRING, and GRASP standards; sensitized avocado aggregators on market quality requirements; linkages of producers to exporters; sensitized SPS competent authorities on identifying illegal pest control products; certified packhouses to BRCGS Version 9 and assessment of Kenya's SPS policy and legal.

2. OBJECTIVE

The objective of this assignment is strengthening capacity of Kenya's horticultural sector through technical assistance, ensuring the supply of quality fruits and vegetables that meet international standards and SPS requirements. This will build on the achievements of phase one, continuing the implementation of Standards and SPS interventions in both the public and private sectors. The focus will be on addressing ongoing and emerging challenges related to compliance with voluntary standards, technical regulations, and SPS measures impacting market access for Kenya's avocado, mango, green beans, and peas. More specifically, the technical assistance is aims at:

- (1) Enhance standards and SPS regulatory systems for Kenya's horticultural sector in alignment with regional and international frameworks.
- (2) Continue strengthening technical capabilities of SPS Competent Authorities to provide SPS official controls and provision of compliance services to facilitate trade in horticultural produce.
- (3) Enable smallholder producers and enterprises to implement Voluntary Sustainability Standards (VSS), technical regulations and SPS requirements for selected Export Supply Hubs.

3. SCOPE OF WORK

The scope of work encompasses support for:

1. Review and update of SPS regulatory frameworks for Horticultural Produce:

- i. Support review, finalization, and adoption of SPS related regulatory frameworks to create an enabling environment for plant protection and food control systems;
