## TERMS OF REFERENCE

### SCOPING, DESIGN AND IMPLEMENTATION OF CROSS-BORDER FISH TRADE PROGRAMME IN NIGERIA AND HER NEIGHBOURING COUNTRIES.

#### 1. Introduction

The **Women & Youth Economic Empowerment in Fisheries sector through Inclusive Market Access Programme** is an initiative led by the AfCFTA Secretariat, in partnership Mastercard Foundation, and TradeMark Africa. The Programme aims to empower women and youth in the fisheries sector across Kenya, Uganda, Tanzania (including Zanzibar), the Democratic Republic of Congo, Zambia, Nigeria, and select island states (Comoros and Nigeria). The programme aims to create over 240,000 job/work opportunities and boost trade in fish and fish products by about \$100 million by 2028.

The programme is designed to address structural challenges women and youth face when participating in the fisheries value chain. It will offer training, facilitate access to markets and finance, catalyse supply chain linkages, create digital solutions, simplify trade regimes, enhance compliance to standards and enable streamlined cross-border market access.

The Programme adopts a market-system development approach, focusing on value-added processed fish products to boost regional trade and job creation for women and youth. It aims to foster a competitive regional fish value chain by improving collaboration and strategic partnership among input systems, producers, traders, processors, exporters and consumers, facilitating access to business development services such as finance and market information etc., as well as addressing legal, regulatory, and business environment barriers. The Programme has three key workstreams as follows.

- i. **Greater inclusion of youth and young women in cross-border fish trade-** designed to bolster the capacity of Cross-Border Traders (CBTs) within the fish sector, with a goal of enhancing intra-Africa trade of fish and fish products. The program will build the capacity of youth and women cross border traders involved in the fish trade to enhance inclusivity in the amplified trade.
- ii. **Improved aquaculture inputs supply and distribution across borders-** focuses on strengthening the competitiveness of traders in the fish sector, particularly those led by women and youth. It entails improving aggregation and logistics of fish feed and fish feed inputs across borders, which are essential to allow MSMEs to compete in the fish sector, and critical in generating upstream and downstream jobs for young people.
- iii. **Improved trading environment for fish trade-** aims to ease trading across borders as a result of reduced barriers to trade for women and youth.

The overarching result of the program is an increase in income and employment, which will be measured by the number of waged and self-employed jobs created. The program targets to generate over 240,000 jobs for the women and an increase regional fish and fish products trade.

### **1.1 Mastercard Foundation**

The Foundation established to advance the following courses:

- i. Establish, operate, and provide Programmes and services to help children and youth access education, understand and utilise technology, and develop skills necessary to succeed in a diverse and global workforce.
- ii. To establish, operate and provide micro-finance Programmes and services to financially disadvantaged persons and communities to economically enhance communities and develop entrepreneurs as a means of relieving poverty.

### **1.2 The AfCFTA Secretariat**

The AfCFTA is a functionally autonomous institutional body with the African Union that coordinates, facilitates, and leads the implementation of the agreement establishing The African Continental Free Area. The AfCFTA Private Sector Unit (PSU) will coordinate efforts at the continental level, facilitating trade linkages and addressing macro-level risks, with a focus on policy and legal regulatory reforms that promote trade and inclusivity. TradeMark Africa will provide technical capacity in setting up the PSU, initially focusing on interventions supported by the Mastercard Foundation, with plans to expand to include other partners.

### **1.3 TradeMark Africa**

TradeMark Africa (TMA) is a leading African Aid-for-Trade organisation, founded in 2010 with the mission to grow intra-African trade and increase Africa's share in global trade, while helping make trade more inclusive and sustainable.

## **2. Context of the Assignment**

Africa's fisheries sector is essential for food security, livelihoods, and poverty alleviation, with women making up 50% of the workforce, particularly in fish processing and trade. However, women face barriers in access to resources and market opportunities. The fish market is valued at \$22 billion annually, with demand expected to rise by 90% by 2030, creating a supply gap. Expanding the value chain and leveraging the AfCFTA could drive growth, but women and youth need targeted support to fully benefit.

Wild capture dominates fish production in Africa, but unsustainable practices like overfishing threaten supply. Aquaculture offers a sustainable solution but accounts for only 18% of production. In Nigeria, cross-border fish trade supports food security and employment, especially for women, yet trade barriers and infrastructure issues hinder growth. Reviewing tariff policies under the AfCFTA is essential to align Nigeria's fish trade and support sector development.

### 3. Objective of the Assignment

The primary objective of this ToR is to competitively identify and recruit a service provider/ consulting firm (s) to carry out a comprehensive situational analysis to assess economic opportunities, challenges/constraints and market/value chain potential for women and youth in fisheries and fish feed supply in Nigeria and its neighbors, and to design and implement interventions based on the situational analysis findings and recommendations.

The proposal should clearly indicate to distinct sections; Part 1: Scoping and Part 2: Design and Implementation

#### **Broadly, the workstreams will be organized as follows:**

##### **3.1 Situational Analysis**

The Programme seeks a consulting firm/service provider to conduct a comprehensive study on cross-border fish trade focusing on Nigeria and its neighbors (Ghana, Benin, Niger, Cameroon). The study aims to assess and map the current fish market structure (producers, processors, distributors, consumers), available market services (such as cold chain infrastructure, finance access, and trade information), and the regulatory environment (policies, standards, and regulations affecting fish trade). Through the value chains approach, the firm will evaluate the fish and fish feed value chains, identify opportunities and constraints, map roles and functions and identify potential interventions that will unlock the sector to lead to value chain upgrading, thus generating economic opportunities for youth and women. It will identify trade opportunities, challenges, and barriers, and prioritize key border crossings along major fish trade corridors. The analysis will provide actionable insights to improve the fish value chain, enhance access to trade and enabling services (such as cold chain, finance, market information etc.), and create a favorable policy environment for private sector investment, with a focus on creating decent job opportunities for women and youth in the fish sector.

The primary objectives of the assignment are:

- To analyze the current fish market in the region, including mapping production, processing, distribution channels, and enabling services and business environment.
- To map and prioritize key border crossings facilitating fish trade between Nigeria and Ghana, Niger, and Benin reviewing volume and value of fish trade.
- To identify and document the main fish commodities traded across these borders mapping out the route to market.
- To analyze the key barriers to fish trade, including regulatory, infrastructural, cultural and procedural challenges
- To provide recommendations for addressing identified trade barriers and enhancing the efficiency of cross-border fish trade. (Recommendations on the ease of doing business across borders).
- To identify and quantify opportunities for decent jobs for youth and women along fish supply chain and provide appropriate recommendations on specific interventions that will enhance inclusivity, sustainability and resilience.

PRQ20241231 - SCOPING, DESIGN AND IMPLEMENTATION OF CROSS-BORDER FISH TRADE PROGRAMME IN NIGERIA AND HER NEIGHBOURING COUNTRIES

- Review of the Simplified Goods Declaration process/form for ECOWAS Trade Liberalization Scheme (ETLS)
- Review the analysis of Sanitary and Phytosanitary Framework and strategies in Nigeria and neighbouring countries. This includes an analysis on the testing capabilities including for heavy metals, microbial, and chemical.
- Analyse and assess the fish feed and fish supply value chain, identify economic opportunities for youth and women and recommend appropriate interventions.

### Scope of Work for Situational Analysis

The scope of work for the assignment will include the following:

- Literature Review:** Analyse existing trade statistics, reports, and studies on fish trade between Nigeria and its neighbouring countries.
