This component aims at enhancing use of green technology solutions e.g. Fish grinder and fish powder packaging machine, Multipurpose solar dryer with assorted equipment, maize mill and maize huller, Cashew Nut Processor among others aimed at mitigating against and adapting to climate change, providing cheaper green solutions using renewable energies e.g. wind, solar energy etc. and driving inclusion of Women in Trade (WiT), youth and Persons with Disabilities (PWDs).

To achieve this, the consultant will undertake Situational Analysis, Stakeholder Engagement, Document Key players and actors and their roles, determine relevant border markets that can optimize green technology and provide an Action Plan and Road Map for design and provision of green technology solutions.

#### 2. Background:

##### 2.1. Description of Trademark Africa (TMA)

TradeMark Africa (TMA) is a leading African Aid-for-Trade organization that was established in 2010, with the aim to grow intra-African trade and increase Africa's share in global trade, while helping make trade more pro-poor and more environmentally sustainable.

TMA operates on a not-for-profit basis and is funded by: the Bill & Melinda Gates Foundation, Canada, Denmark, the European Union, Finland, France, Ireland, the Mastercard Foundation, the Netherlands, Norway, the United Kingdom, and the United States of America. TMA works closely with regional and continental inter-governmental organizations, national governments, the private sector, and civil society.

Since its inception, TMA has delivered substantial gains for trade and regional economic integration in East Africa and the Horn of Africa, including a reduction of 16.5% in cargo transit times on the Northern Corridor from Mombasa to Bujumbura, and a reduction of an average of 70% in the time taken to cross select one stop border posts. TMA officially launched its continental-wide shift and rebrand in West Africa in January 2023, with Ghana being the first country of operations in the region.

In 2022, TMA set up a catalytic finance company – Trade Catalyst Africa (TCA) – that will pilot commercially viable projects for creating trade infrastructure (both physical and digital) as well as increasing access to Trade Finance for Small and Medium Enterprises (SMEs).

Both TMA and TCA's headquarters are in Nairobi, Kenya. Offices are in: EAC Secretariat – Arusha, Burundi, the Democratic Republic of Congo, Djibouti, Ethiopia, Ghana, Malawi, Rwanda, Somaliland, Tanzania, Uganda, and Zambia with operations in Benin, Mozambique, South Sudan, Togo and will soon be in Nigeria. For more information, please visit [www.trademarkafrica.com](http://www.trademarkafrica.com)

## **2.2. Description of Micro & Small Enterprises Authority (MSEA)**

The Micro and Small Enterprise Authority (MSEA) is a state corporation established under the Micro and Small Enterprise Act No. 55 of 2012. The Act was developed through a stakeholder's consultation process which took several years. The Authority is now domiciled in the Ministry of Co-operatives and MSME Development.

The Act gives the Authority the mandate to formulate and Coordinate policies that will facilitate the integration and harmonization of various public and private sector initiatives, for the promotion, development and regulation of the Micro and Small Enterprises to become key Industries of Tomorrow. The Micro and Small Enterprises (MSEs) occupy a very strategic position in the development of this country. They cut across all sectors of the Kenyan economy and have been identified as major contributors to employment creation and income generation. Micro and Small Enterprises are therefore a major vehicle for poverty reduction and wealth creation. Successive governments have, therefore, over the years supported the growth and development of the sector by implementing targeted interventions and programmes aimed at making it more vibrant. However, the full potential of the sector has not been realized and The MSE Act now gives the Authority legal power to address problem facing MSEs.

MSEA collaborates with trade facilitation entities such as TradeMark Africa (TMA) and other key partners to support MSEs by improving their access to regional and international markets, enhancing trade infrastructure, and streamlining regulatory frameworks to reduce trade barriers. As part of these efforts, MSEA promotes the adoption of green technology and sustainable business practices among MSEs to enhance their competitiveness in global markets. Additionally, MSEA prioritizes inclusivity by implementing targeted programs that empower Women in Trade (WiT), youth, and Persons with Disabilities (PWDs) to ensure that these groups can fully participate in and benefit from trade opportunities.

## **2.3. About the Project**

There is a clear nexus between climate change mitigation and adaptation measures, green technology solutions and inclusion of Women in Trade (WiT), youth and Persons with Disabilities (PWDs) in greening cross border trade. The commitment to keep global warming below 1.5°C compared to pre-industrial levels cannot be achieved without addressing trade-related emissions, which account for as much as a quarter of all Green House Gas (GHG) emissions. As late industrialisers, they contribute less than 4% of global GHG emissions, although emerging emitters worldwide accounted for 40% of the increase in emissions from 2010-2018<sup>1</sup>. Resultantly, emission increment threatens the growth of trade and exports, nascent value chains and livelihoods of vulnerable communities, notably small and medium-sized enterprises (SMEs) involved in production and cross-border trade and further exacerbates the vulnerability of marginalized groups such as WiT, Youth and PWDs. Increasingly severe weather events result in infrastructural damage, insecure energy supply, unpredictable growing seasons, post-harvest losses and losses of livelihoods among others.

<sup>1</sup> <https://openknowledge.worldbank.org/server/api/core/bitstreams/88a20959-9af7-53eb-b5bf-a217cf084964/content>

Climate change risks are worsening the participation of WiT, Youth and PWDs. in cross border trade. For instance, According to the International Trade Centre (ITC) data, in Kenya, women-owned SMEs constitute only a third of all SMEs<sup>2</sup>. Women-owned representation in export SMEs is likely to be even lower.

In order to deliver the step-change necessary to position Kenya as a pioneer in green growth and inclusion, ambitious plans need to be set. TMA is focused on strengthening green growth, increasing climate resilience and reducing GHG emissions in cross border trade – with the aim of driving inclusive, low carbon and resilient trade in the region. Successfully achieving this will rely both on supporting and enhancing green trade. Specific to border points between Kenya and her neighbors, TMA has identified green technology solutions as a key driver to mitigate against and adapt to climate change through solutions to monitor, reduce, and eliminate environmental degradation while delivering meaningful trade and economic gains. These include renewable energy-driven technology solutions, air and water filtration systems, circular economy, waste-to-energy technologies, and methods for safe disposal or repurpose of industrial waste.

TMA and MSEA will collaborate with sectoral stakeholders ranging from Ministry of Co-operatives and Micro, Small and Medium Enterprises (MSME), Border Management Secretariat, State Department for Investment Promotion, State Department for Trade, select Business Membership Organizations (BMOs) to deliver the design and provision of green technology solutions to the select border markets.

### **3. Objectives of The Assignment**

The objective of the study is to undertake a situation analysis, determine relevant border markets to optimize green technology solutions, document key stakeholders and define their roles in implementing green trade initiatives, provide an action plan (including supervisory plan), and design study for provision of green technology solutions to WiT, Youth and PWDs. and propose capacity building strategies for WiT, Youth and PWDs on the use and maintenance of green technologies.

### **4. Scope of Work**

#### **a. Situational Analysis-**

- I. Evaluate and assess the current situation and practices within border points to determine Strength, Weakness, Opportunities and Threats (SWOT) of the current state of play at the border points & the gap in adoption of green technology solutions.
- II. Evaluate past and ongoing projects focused on green technology solutions at border markets
- III. Identify critical compliance gaps and vulnerabilities that could hinder adoption of green technology solutions e.g. lack of local / cross border markets for value added goods e.g. dried mangoes etc.

#### **b. Stakeholder Engagement-**

- I. Map key stakeholders are involved in trade facilitation and green technology solutions at the border points (customs authorities, security, trade associations, local government, border agencies) and their roles.
- II. Organize stakeholder workshops and interviews to confirm results and include a range of viewpoints in the action plan.

Some of the factors to consider include the eligibility criteria, carrying out background check/due diligence of information provided by Cooperatives/ SMEs, capacity and readiness evaluation.
