The Client is not bound to accept any proposal and reserves the right to annul the selection process at any time prior to Contract award, without thereby incurring any liability to the Consultant.

9. Language

9.1 The Proposal, as well as all correspondence and documents relating to the Proposal exchanged between the Consultant and the Client, shall be written in the language(s) specified in the **Data Sheet**.

in more than one Proposal when circumstances justify and if stated in the **Data Sheet**.

- | | |
|---|--|
| 12. Proposal Validity | <p>12.1 Proposals shall remain valid until the date specified in the Data Sheet or any extended date if amended by the Client in accordance with ITC 13.1.1.</p> <p>12.2 During this period, the Consultant shall maintain its original Proposal without any change, including the availability of the Key Experts, the proposed rates and the total price.</p> <p>12.3 If it is established that any Key Expert nominated in the Consultant's Proposal was not available at the time of Proposal submission or was included in the Proposal without his/her confirmation, such Proposal shall be disqualified and rejected for further evaluation and may be subject to sanctions in accordance with ITC 5.</p> |
| a. Extension of Proposal Validity | <p>12.4 The Client will make its best effort to complete the negotiations and award the contract prior to the date of expiry of the Proposal validity. The technical evaluation score, however, will remain to be based on the evaluation of the CV of the original Key Expert.</p> <p>12.8 If the Consultant fails to provide a substitute Key Expert with equal or better qualifications, or if the provided reasons for the replacement or justification are unacceptable to the Client, such Proposal will be rejected.</p> |
| c. Sub-Contracting | <p>12.9 The Consultant shall not subcontract the whole of the Services.</p> |
| 13. In all such cases a shortlisted Consultant must obtain the written approval of the Client prior to the submission of the Proposal. 23.4 The Consultant's attendance at the opening of the Financial Proposals is optional and is at the Consultant's choice.

23.5 The Financial Proposals shall be opened by the Client's staff in the presence of the representatives of the Consultants and anyone else who chooses to attend. Any interested party who wishes to attend this opening should contact the client as indicated in the **Data Sheet**. Alternatively, a notice of the public opening of Financial Proposals may be published on the Client's website, if available. At the opening, the names of the Consultants, and the overall technical scores, including the break-down by criterion, shall be read aloud. The Financial Proposals will then be inspected to confirm that they have remained sealed and unopened. These Financial Proposals shall be then opened, and the total prices read aloud and recorded. Copies of the record shall be sent to all Consultants who submitted Proposals and to TMA.

24. Correction of Errors

24.1 Activities and items described in the Technical Proposal but not priced in the Financial Proposal, shall be assumed to be included in the prices of

other activities or items, and no corrections are made to the Financial Proposal.

a. Time-Based Contracts

24.1.1 If a Time-Based contract form is included in the RFP, the Client's evaluation committee will (a) correct any computational or arithmetical errors, and (b) adjust the prices if they fail to reflect all inputs included for the respective activities or items included in the Technical Proposal. In case of discrepancy between (i) a partial amount (sub-total) and the total amount, or (ii) between the amount derived by multiplication of unit price with quantity and the total price, or (iii) between words and figures, the former will prevail. In case of discrepancy between the Technical and Financial Proposals in indicating quantities of input, the Technical Proposal prevails, and the Client's evaluation committee shall correct the quantification indicated in the Financial Proposal so as to make it consistent with that indicated in the Technical Proposal, apply the relevant unit price included in the Financial Proposal to the corrected quantity, and correct the total Proposal cost.

b. Lump-Sum Contracts

24.1.2 If a Lump-Sum contract form is included in the RFP, the Consultant is deemed to have included all prices in the Financial Proposal, so neither arithmetical corrections nor price adjustments shall be made. The total price, net of taxes understood as per ITC 25, specified in the Financial Proposal (Form FIN-1) shall be considered as the offered price. Where there is a discrepancy between the amount in words and the amount figures, the amount in words shall prevail.

25. Taxes

25.1 The Client's evaluation of the Consultant's Financial Proposal shall exclude taxes and duties in the Client's country in accordance with the instructions in the **Data Sheet**.

26. Conversion to Single Currency

26.1 For evaluation purposes, prices shall be converted to a single currency using the selling rates of exchange, source, and date indicated in the **Data Sheet**.

27. Combined Quality and Cost Evaluation

a. Quality and Cost-Based Selection (QCBS)

27.1 In the case of QCBS, the total score is calculated by weighting the technical and financial scores and adding them as per the formula and instructions in the **Data Sheet**. The Consultant with the Proposal that achieves the highest combined technical and financial scores will be invited for contract negotiations.

b. Fixed-Budget Selection (FBS)

27.2 In the case of FBS, those Proposals that exceed the budget indicated in ITC 14.1.4 of the **Data Sheet** and those that do not achieve the minimum qualifying technical score shall be rejected.

27.3 The Client will select the Consultant with highest-ranked Technical Proposal score that does not exceed the budget indicated in the RFP and invite such Consultant to negotiate the Contract.

c. Least-Cost Selection (LCS)

- 27.4 In the case of Least-Cost Selection (LCS), the Client will select the Consultant with Proposal with the lowest evaluated total price among those Proposals that achieved the minimum qualifying technical score and invite such a Consultant to negotiate the Contract.

D. Negotiations and Award

28. Negotiations

- 28.1 The negotiations will be held at the date and address indicated in the Data Sheet with the Consultant's representative(s) who must have written power of attorney witnessed by a Commissioner of Oaths or similar authority to negotiate and sign a Contract on behalf of the Consultant.
- 28.2 The Client shall prepare minutes of negotiations that are signed by the Client and the Consultant's authorized representative.

a. Availability of Key Experts

- 28.3 The invited Consultant shall confirm the availability of all Key Experts included in the Proposal as a pre-requisite to the negotiations, or, if applicable, a replacement in accordance with ITC 12. Failure to confirm the Key Experts' availability may result in the rejection of the Consultant's Proposal and the Client proceeding to negotiate the Contract with the next-ranked Consultant.
- 28.4 Notwithstanding the above, the substitution of Key Experts at the negotiations may be considered if due solely to circumstances outside the reasonable control of and not foreseeable by the Consultant, including but not limited to death or medical incapacity. In such case, the Consultant shall offer a substitute Key Expert within the period of time specified in the letter of invitation to negotiate the Contract, who shall have equivalent or better qualifications and experience than the original candidate.

b. Technical Negotiations

- 28.5 The negotiations include discussions of the Terms of Reference (TORs), the proposed methodology, the Client's inputs, the special conditions of the Contract, and finalizing the "Description of Services" part of the Contract. These discussions shall not substantially alter the original scope of services under the TOR or the terms of the contract, lest the quality of the final product, its price, or the relevance of the initial evaluation be affected.

c. Financial Negotiations

- 28.6 The negotiations include clarification of the Consultant's tax liability in the Client's country and how it should be reflected in the Contract.
- 28.7 In the case of *Lump-sum contract*, if the selection method included cost as a factor in the evaluation, that is for QCBS, FBS, and LCS, the total price stated in the Financial Proposal shall not be negotiated. Where the selection method is QBS, the contract negotiations shall be done including price to ensure current market prices and rates for remuneration and reimbursables.
- 28.8 In the case of a *Time-Based contract*, unit rates negotiations shall not take place, except when the offered Key Experts and Non-Key Experts' remuneration rates are much higher than the typically charged rates by consultants in similar contracts. In such case, the Client may ask for clarifications and, if the fees are very high, ask to change the rates after

consultation with TMA. The reimbursable expenses shall be supported by official receipts and evidence of payment.

29. Conclusion of Negotiations

- 29.1 The negotiations are concluded with a review of the finalized draft Contract, which then shall be initialed by the Client and the Consultant's authorized representative.
- 29.2 If the negotiations fail, the Client shall inform the Consultant in writing of all pending issues and disagreements and provide a final opportunity to the Consultant to respond. If disagreement persists, the Client shall terminate the negotiations informing the Consultant of the reasons for doing so.
- 29.3 The Client will then invite the next-ranked Consultant to negotiate a Contract. Once the Client commences negotiations with the next-ranked Consultant, the Client shall not reopen the earlier negotiations.

30. Standstill Period

- 30.1 The Contract shall not be awarded earlier than the expiry of the Standstill Period. The Standstill Period shall be three (3) Business Days unless extended in accordance with ITC 33. The Standstill Period commences the day after the date the Client has transmitted to each Consultant Notification of Intention to Award the Contract.

31. Notification of Intention to Award

- 31.1 The Client shall send to each Consultant the Notification of Intention to Award the Contract to the successful Consultant.

32. Notification of Award

- 32.1 Upon expiry of the Standstill Period, specified in ITC 30.1 or any extension thereof, and upon satisfactorily addressing any complaint that has been filed within the Standstill Period, and upon conduct of due diligence where required, the Client shall, send a Letter of Acceptance to the successful Consultant, confirming the Client's intention to award the Contract to the successful Consultant and requesting the successful Consultant to sign and return the draft negotiated Contract within three (3) Business Days from the date of receipt of such notification.
- 32.2 Within ten (10) Business Days from the date of signing the contract, the Client shall publish the Contract Award Notice, on Client's website with free access to the public.

33. Debriefing by the Client

- 33.1 On receipt of the Client's Notification of Intention to Award referred to in ITC 31.1, an unsuccessful Consultant may make a written request to the Client for a written debriefing and the Client shall provide the debriefing.
- 33.2 Debriefings of unsuccessful Consultants may be done in writing or verbally. The Consultants shall bear their own costs of attending such a debriefing meeting.

34. Signing of Contract

- 34.1 The Contract shall be signed prior to the expiry date of the Proposal validity and promptly after expiry of the Standstill Period, specified in ITC 30.1 or any extension thereof, and upon satisfactorily addressing any complaint that has been filed within the Standstill Period.
- 34.2 The Consultant is expected to commence the assignment on the date and at the location specified in the **Data Sheet**.

CONSULTANCY SERVICES FOR PRE-FEASIBILITY, COMMERCIAL STRUCTURING AND INVESTMENT PREPARATION OF THE TOG WAJAALE LOGISTICS CENTRE, AND CROSS BORDER UPGRADE ALONG THE BERBERA CORRIDOR CONNECTING ETHIOPIA AND SOMALILAND

ABOUT TRADEMARK AFRICA

TradeMark Africa (TMA) is an Aid-for-Trade organisation established in 2010 with the objective of growing prosperity through increased trade. TMA operates on a not-for-profit basis and is funded by a range of development partners, including the European Union, the United Kingdom, the Netherlands, Denmark, Norway, Canada, the United States, Ireland, Finland, and the Bill & Melinda Gates Foundation. TMA works in partnership with regional and continental organisations, including the African Union, the AfCFTA Secretariat, the East African Community, the Intergovernmental Authority on Development, and COMESA, as well as national governments, the private sector and civil society.

TMA supports programmes and investments that improve trade competitiveness through enhanced trade facilitation, efficient transport and logistics systems, digital trade solutions, improved border management and strengthened trade-related institutions. TMA operates across East, West and Southern Africa, with headquarters in Nairobi, Kenya.

2. BACKGROUND AND CONTEXT

Ethiopia is one of Africa's fastest growing economies and a key regional trade hub in the Horn of Africa. Sustained growth, industrialisation, urbanisation and expanding regional trade have increased demand for efficient transport, logistics and trade facilitation systems. High logistics costs, infrastructure constraints and corridor inefficiencies continue to undermine trade competitiveness and raise the cost of doing business.

The Berbera Corridor links the Port of Berbera in Somaliland to Ethiopia through the Tog Wajaale border crossing and onward to major commercial centres within Ethiopia. The corridor offers an opportunity to diversify Ethiopia's access to international markets, strengthen supply chain resilience, deepen regional integration and support economic growth in both Ethiopia and Somaliland. Over the past decade the Governments of Ethiopia and Somaliland, together with development partners including TMA and the UK Foreign, Commonwealth and Development Office (FCDO), have invested in transport infrastructure, border management systems, customs modernisation and trade facilitation along the corridor.

Despite these investments, gaps remain in the commercial infrastructure and services required to support growing trade volumes. At Tog Wajaale, rising freight traffic and cross-border trade have created demand for organised freight handling, truck staging and parking, value addition and cold chain services, and improved market infrastructure serving both formal and informal trade, including women-owned enterprises. The absence of an integrated logistics facility limits efficient management of freight movements and constrains the provision of complementary services to transporters, traders and freight operators. Existing market facilities face constraints of infrastructure quality, storage, utilities, organisation and access to services.

The proposed Logistics Centre and Cross-Border Market Upgrade are binational in nature. They are situated at a crossing point shared by Ethiopia and Somaliland, and their long-term success depends on genuine joint ownership by both Governments. Both Governments shall participate as decision-making partners in the governance of this assignment, and the Consultant shall design its engagement, analysis and recommendations accordingly.

With support from FCDO through the Capital Development and Economic Lending (CDEL) facility, TMA intends to explore catalytic investments in a Tog Wajaale Logistics Centre and an upgrade of Cross-Border Market infrastructure.. Prior to any investment decision, TMA requires pre-feasibility, commercial structuring and investment preparation studies to establish whether, and on what basis, these investments should proceed.

The Consultant shall maintain an independent and evidence-based approach throughout the assignment. The existence of the proposed investments shall not be treated as a presumption that either investment is commercially, economically, technically or institutionally viable.

2.1 Project description, location and jurisdiction

For the avoidance of doubt in planning and pricing, bidders shall base their proposals on the following:

- **Logistics Centre.** Proposed on the [insert: Ethiopian / Somaliland] side of the border at [insert location and approximate coordinates], with an indicative land requirement of [insert] hectares.
- **Cross-Border Market.** The existing facility at [insert name and side of border], with an approximate footprint of [insert] and approximately [insert] trading spaces currently in use.
- **Land status.** Land for the Logistics Centre is [insert: identified and allocated / identified but not yet allocated / not yet identified]. Where land is not secured, site options shall be assessed under Task 3.
- **Field work.** Field work is required on both sides of the Tog Wajaale crossing, in Ethiopia and Somaliland, including engagement with the Government of Somaliland institutions named at Section 10. Bidders shall price mobilisation, visas, permits, local partnership and security in both jurisdictions accordingly.
- **Related investments.** The Consultant shall have regard to TMA and FCDO investments in place or under construction at and around the crossing, listed at Annex A, and shall assess interfaces with them.

The final project description, site information, land status and interfaces with existing or planned investments shall be confirmed during inception. Any material change to these parameters shall be documented in the Inception Report and shall not relieve the Consultant of its obligation to assess the viability of the proposed investments objectively.

3. PURPOSE OF THE ASSIGNMENT

The purpose of this assignment is to undertake pre-feasibility, commercial structuring and investment preparation studies for the proposed Tog Wajaale Logistics Centre and Cross-Border Market Upgrade,

and to provide TMA and FCDO with an evidence base sufficient to take an informed go, no-go or go-with-modification decision on each investment, and to advance any preferred option to full feasibility, financing and procurement.

The assignment is not premised on a positive outcome. A reasoned recommendation not to proceed, to proceed at reduced scope, or to defer pending stated conditions is a legitimate and acceptable output of this assignment. The Consultant shall exercise independent professional judgement and shall report findings that are unfavourable to the proposed investments with the same rigour as those that are favourable.

The Consultant shall clearly distinguish between (i) findings supported by verified evidence, (ii) assumptions adopted due to data limitations, and (iii) recommendations requiring further investigation during the next stage.

4. SPECIFIC OBJECTIVES

The specific objectives are to:

- Establish current and projected trade, freight, transport and market demand relevant to the proposed investments, including the do-minimum counterfactual.
- Determine the technical, spatial, operational and infrastructure requirements of the proposed investments and prepare concept-level development options.
- Establish the commercial viability, financial sustainability and economic return of each option, including tariff and revenue potential, operating models and any viability gap.
- Establish the legal, regulatory, land, institutional and governance arrangements required for development, ownership, operation and long-term sustainability.
- Assess the bilateral institutional, legal and governance arrangements between the Government of Ethiopia and the Government of Somaliland relevant to the joint development, operation and governance of cross-border infrastructure at Tog Wajaale, and recommend a governance model that reflects joint ownership by both Governments.
- Screen environmental, social, climate, gender and inclusion risks and opportunities, and define the safeguard instruments required at the next stage.
- Assess financing, commercial structuring, partnership and implementation options, including private sector participation and blended finance, and test them through market sounding.
- Demonstrate additionality — that the proposed investments address a defined market failure and crowd in rather than displace existing or planned private provision.
- Establish the expected development results, value for money and climate alignment of the proposed investments.
- Deliver an investment preparation package and roadmap sufficient to support a decision and to advance the preferred option to full feasibility, financing and procurement.

- Establish the key conditions precedent to investment, including land, legal, institutional, regulatory, environmental and social, financing, demand and market conditions, and clearly distinguish those that must be satisfied before the next investment stage.
- Identify the principal risks to investment viability and allocate each material risk to the party best placed to manage it, including any residual risks that may require public-sector or donor support.

5. STANDARDS, FRAMEWORKS AND DEFINITION OF INVESTMENT READINESS

5.1 Applicable standards and frameworks

The Consultant shall apply, and shall demonstrate application of, the following:

- Cost estimation: AACE International Recommended Practice for cost estimate classification, at Class 4/5 accuracy for pre-feasibility.
- Economic and financial appraisal: recognised international good practice for infrastructure appraisal, including explicit treatment of the counterfactual, shadow pricing, sensitivity and switching values.
- Environmental and social: IFC Performance Standards; the World Bank Environmental and Social Framework where applicable; FCDO safeguarding and PSEAH requirements; and the national environmental and social law of each jurisdiction of performance.
- Climate: assessment of consistency with the goals of the Paris Agreement, including mitigation, adaptation and resilience, and estimation of the indicative greenhouse gas footprint of each option.
- Value for money: assessment against economy, efficiency, effectiveness and equity, consistent with FCDO expectations for capital investment.
- Business case structure: the final investment case shall be capable of supporting an FCDO business case and DFI appraisal, addressing strategic, economic, commercial, financial and management dimensions.

Any other internationally recognised standards, guidelines or methodologies considered material to the assignment shall be identified in the Inception Report and agreed with TMA before application.

5.2 Definition of investment readiness

For the purposes of this assignment, an investment is treated as investment-ready when all of the following can be evidenced:

- A defined and quantified demand case, with forecasts, assumptions and sources capable of independent scrutiny.
- A defined scope, site, land pathway and concept design of sufficient resolution to support a cost estimate at the stated accuracy class.
- A capital and lifecycle cost estimate with stated base date, currency, escalation and contingency.

- A financial model demonstrating the funding requirement, the revenue basis, any viability gap, and the conditions under which the investment is financially sustainable.
- An economic appraisal demonstrating net economic benefit against the counterfactual.
- A workable ownership, governance and operating structure, with the responsible institution identified and its capability assessed.
- A clear legal and land pathway, with the required approvals identified and sequenced.
- An E&S risk categorisation and a defined set of instruments, costs and lead times for the next stage.
- Evidence of market appetite from potential operators, investors or financiers.
- A roadmap to financial close with actions, owners, sequencing, cost and critical path.
- A clearly defined set of outstanding actions and conditions precedent, with responsible parties and indicative timelines, such that TMA can determine precisely what remains to be completed before progressing to the next investment stage.

5.3 Decision criteria

The Consultant shall propose, and agree with TMA at inception, the quantified thresholds against which the go, no-go or go-with-modification recommendation will be made. These shall include, as a minimum, economic return against the applicable discount rate, financial sustainability of operations without recurrent subsidy, deliverability of the land and legal pathway, E&S acceptability, and demonstrated additionality.

The agreed decision criteria shall be applied consistently to each investment option and shall be presented in a decision matrix showing the assessment against each criterion, the evidence supporting the assessment, any material gaps and the resulting recommendation.

6. SCOPE OF WORK

The Consultant shall undertake the following tasks. The minimum requirements stated are the basis on which proposals shall be priced. Bidders may propose additional work, clearly identified and separately priced.

1. Task 1 — Inception and mobilisation

- Review the documentation listed at Annex A and any further material provided by TMA.
- Hold a kick-off meeting with TMA within ten (10) working days of contract signature, and inception engagements with the Government of Ethiopia and the Government of Somaliland, including the Somaliland Ministry of Trade and Tourism and the Ministry of Transport and Roads Development.
- Confirm the land tenure, site status and permitting authority applicable to each proposed investment, and identify any bilateral agreement, memorandum of understanding or other instrument between the two Governments required to support their joint development, together with the process and indicative timescale for putting it in place.

- Confirm methodology, sampling frames, survey instruments, forecasting approach and appraisal parameters, including appraisal period, base date, currency, exchange rates, financial and economic discount rates, and the treatment of taxes and duties.
- Agree the option long-list, the do-minimum counterfactual, and the quantified decision criteria under Section 5.3.
- Submit a consolidated data request register identifying each dataset required, its holder, and the consequence for the methodology if it cannot be obtained, together with the fallback method to be used in that event.
- Submit a field mobilisation and security plan, a safeguarding and PSEAH code of conduct for field teams, and a data protection and informed consent protocol for primary surveys.
- Submit a risk and dependency register for the assignment itself, to be maintained and reported monthly.
- The Inception Report shall be reviewed by TMA and by both Governments and shall be signed off in accordance with Section 8.1 before the Consultant proceeds to subsequent deliverables.

2. **Task 2 — Trade, freight and market demand assessment**

- Compile and validate five (5) years of historical traffic, trade and customs data for the Tog Wajaale crossing, disaggregated by commodity, direction, vehicle type, consignment size and formal or informal channel.
- Undertake primary data collection comprising, as a minimum: classified vehicle and freight counts over at least seven (7) consecutive days covering peak and off-peak conditions, with an explicit adjustment for seasonality supported by evidence; an origin–destination and commodity survey of at least two hundred (200) truck operators; structured interviews with at least thirty (30) transporters, clearing agents, freight forwarders and trade associations; and a survey of at least two hundred (200) market traders, of whom no fewer than fifty per cent (50%) shall be women.
- Quantify informal and small-scale cross-border trade using a stated and defensible method, and identify the constraints specific to women traders, including safety, sanitation, storage, childcare, credit and information access.
- Establish current dwell time, queuing, turnaround and cost per consignment at the crossing, to serve as the baseline for benefit estimation.
- Prepare demand forecasts to 2045 under low, base and high scenarios, with elasticities, drivers and assumptions stated and sourced, and with an explicit view on the effect of Berbera Port capacity, corridor road improvements and regional trade policy.
- Map existing and planned competing or complementary facilities along the corridor, including Berbera Port, corridor dry ports and terminals, private truck yards, warehousing and cold storage, and any planned public facilities.
- Assess additionality and market failure: state explicitly whether the proposed investments would crowd in or displace existing and planned private provision, and on what evidence.

3. **Task 3 — Site, technical and operational pre-feasibility**

- Assess a minimum of two (2) candidate sites for the Logistics Centre and, for the Market, the existing site plus at least one (1) alternative or expansion option, against site selection criteria agreed at inception.
- Undertake a site walkover and photographic record; desk screening of topography, flood risk, drainage and ground conditions; and confirmation of utility availability and capacity covering power, water, telecommunications, wastewater and solid waste.
- Assess access roads, junctions, queuing, truck circulation and parking demand, and the interface with existing border, customs and one-stop border post operations and with any TMA-funded facilities in place or under construction.
- Establish land tenure, ownership, encumbrances, current use and occupancy at each candidate site, and the process, approvals and indicative timescale for securing land.
- Prepare a concept masterplan for each option at 1:1000 or 1:2000 and a schedule of accommodation covering, as applicable, truck parking and staging bays, warehousing, cold chain capacity, weighbridge, inspection and scanning areas, workshop and fuel, driver amenities, market stalls, wholesale and storage areas, and ancillary and administrative facilities.
- Specify the digital and systems requirements, including gate and access control, weighbridge integration, yard management, and interface with customs and single window systems.
- Specify utilities strategy including power supply options and on-site generation, water supply and storage, wastewater and solid waste management, and fire safety.
- Specify gender-responsive and inclusive design requirements, including safe and separate sanitation, lighting, secure storage, childcare provision, and universal accessibility.
- Define climate-resilient and resource-efficient design parameters, and the operations and maintenance regime, including indicative annual O&M cost, staffing, and the maintenance capability required of the operator.
- Prepare a phasing strategy identifying the minimum viable first phase and subsequent phases triggered by demand.

4. **Task 4 — Cost estimation**

- Prepare capital, operating, maintenance and lifecycle cost estimates for each option over a twenty-five (25) year appraisal period.
- Estimates shall be at AACE International Class 4/5 accuracy, indicatively minus thirty per cent to plus fifty per cent, and shall state base date, currency, exchange rates, escalation, contingency, and the treatment of duties and taxes.
- Unit rates shall be benchmarked against comparable regional projects, with sources identified, and shall reflect the logistics and access constraints of the location.
- Costs shall be presented separately for each phase and each option, in a format that maps directly to the financial model.

5. Task 5 — Commercial, financial and economic appraisal

- Assess users' willingness and ability to pay and prepare tariff and pricing options for each revenue line, tested against affordability for small-scale and informal traders.
- Identify revenue streams, anchor tenant and operator prospects, utilisation assumptions and demand risk.
- Build a financial model meeting the requirements of Section 15, producing FIRR, FNPV, payback, debt service cover, funding requirement, and any viability gap or subsidy requirement, under each option and scenario.
- Undertake an economic appraisal producing EIRR, ENPV and benefit–cost ratio against the do-minimum, quantifying time and cost savings, reduced spoilage, improved market access and other benefits, with shadow prices and conversion factors stated.
- Undertake sensitivity, scenario and switching-value analysis on the principal variables, including demand, tariff, capital cost, exchange rate and operating cost.
- Undertake a distributional analysis identifying who bears costs and who receives benefits, with specific treatment of small-scale, informal and women traders.
- Assess value for money against economy, efficiency, effectiveness and equity, and set out the expected development results with baselines, indicators and targets capable of incorporation into TMA and FCDO results frameworks, including jobs supported, trade cost and time reduction, and trader incomes.

6. Task 6 — Legal, regulatory, land and institutional assessment

- Assess the applicable legal and regulatory framework in each relevant jurisdiction, covering land tenure and allocation, planning and permitting, PPP and concession law, customs and border regulation, operating licences, employment and sector regulation.
- Assess taxation, value added tax and withholding tax treatment, customs duties on imported works and equipment, foreign exchange access and repatriation, and the effect of each on cost and bankability.
- Map the institutions with a role in development, ownership, regulation and operation; set out decision rights, approvals required and indicative timescales; and assess the capability and financial capacity of the prospective owner and operator.
- Assess ownership, governance and management options, including public ownership, public corporation, lease, management contract, concession, joint venture and private development, and recommend a preferred arrangement with justification.
- Assess the bilateral legal, institutional and governance arrangements between the two Governments required for joint development, ownership, operation and revenue sharing, and recommend a governance model that reflects genuine joint ownership, identifying the bilateral instrument required to give it effect and the steps to conclude it.

- Identify the cross-border legal and institutional arrangements required where the investments or their users operate across the Ethiopia–Somaliland boundary, including customs, immigration, standards, dispute resolution and applicable law.

9. Task 9 — Stakeholder engagement and validation

- Maintain a stakeholder register and engagement log throughout the assignment.

- Facilitate at least three (3) validation workshops: one at Tog Wajaale with border agency, trader, transporter and operator stakeholders, attended by named representatives of the Government of Somaliland; one at Addis Ababa with Government of Ethiopia institutional stakeholders; and one at Hargeisa with Government of Somaliland institutional stakeholders, which may be held remotely by prior agreement with TMA. In addition, the Consultant shall facilitate one (1) investment review session with TMA and FCDO.
- Design engagement so that small-scale traders, women, youth, persons with disabilities and cooperative members can participate effectively, including timing, language, venue accessibility and the use of women enumerators and facilitators.

8.1 Review and acceptance

- TMA shall issue consolidated written comments on each deliverable within ten (10) working days of receipt.
- The Consultant shall submit a revised deliverable, with a comment–response matrix, within ten (10) working days of receiving comments.
- A maximum of two (2) review rounds per deliverable is anticipated. Further rounds arising from the Consultant’s failure to address comments shall be at the Consultant’s cost.
- Where TMA does not issue comments within the stated period, the Consultant shall notify TMA in writing and the time for completion shall be extended day-for-day, without adjustment to the contract price, up to a cumulative maximum of fifteen (15) working days.
- A deliverable is accepted only on written acceptance by TMA. Submission of an incomplete deliverable, or one omitting a required component, shall not start the review period.
- The Inception Report and the Final Investment Preparation Package additionally require sign-off or formal endorsement by the Government of Ethiopia and the Government of Somaliland. TMA shall convene the Joint Steering Committee and shall be responsible for obtaining that sign-off or endorsement within fifteen (15) working days of TMA’s own acceptance.
- Where sign-off or endorsement is not obtained within that period, the Consultant shall notify TMA and may, on TMA’s written instruction, proceed to subsequent tasks. The time for completion shall be extended day-for-day for any period of delay beyond fifteen (15) working days, and any resulting standing time or remobilisation cost shall be agreed in writing before it is incurred.
- Payment shall be made within thirty (30) days of written acceptance and receipt of a valid invoice.

Application of liquidated damages does not limit TMA's other remedies, including suspension or termination for persistent non-performance.

8.3 Reporting standards

- Reports shall be concise and decision focused. The final report shall not exceed eighty (80) pages excluding annexes, with a standalone executive summary of no more than ten (10) pages.
- All figures shall state units, currency, base date and source. All data presented shall be traceable to an annexed dataset.
- Every material assumption shall be identified as such, with its basis and the effect on the conclusion if it does not hold.
- TMA and FCDO visibility and branding requirements shall be applied as advised at inception.

9. INFORMATION AND SUPPORT TO BE PROVIDED BY TMA

TMA shall:

- Provide the documents listed at Annex A within five (5) working days of contract signature and respond to reasonable further data requests within ten (10) working days.
- Nominate a single focal point for the assignment, establish the Joint Steering Committee and confirm the membership of the Technical Working Group.
- Convene the Joint Steering Committee at each deliverable milestone and be responsible for obtaining Government sign-off and endorsement within the periods stated at Section 8.1.
- Issue letters of introduction to relevant government and border agencies within ten (10) working days of contract signature and facilitate initial institutional meetings.
- Facilitate, but not guarantee, access to border facilities and to customs and trade data held by government agencies.
- Bear the travel and subsistence costs of government and stakeholder participants at validation workshops.
- Advise on FCDO and TMA branding and visibility requirements at inception.

Obtaining visas, work permits, survey permissions and security clearances for its personnel remains the responsibility of the Consultant, who shall allow for this in the programme and the price.

TMA does not warrant the completeness, accuracy or availability of third-party information provided to the Consultant. The Consultant shall remain responsible for assessing the reliability and suitability of information used in its analysis.

10. REPORTING, COORDINATION AND GOVERNANCE

The Consultant shall report to TMA through the Programme Manager responsible for the programme and shall work with the relevant TMA technical teams.

A Joint Steering Committee comprising TMA, FCDO, the Government of Ethiopia and the Government of Somaliland shall be established to provide oversight of the assignment and to reflect the joint ownership of both Governments. The Joint Steering Committee shall meet at each deliverable milestone, shall provide strategic direction, and shall be the forum through which Government sign-off of the Inception Report and endorsement of the Final Investment Preparation Package is obtained.

A Technical Working Group chaired by TMA shall operate at working level and shall comprise nominated counterpart institutions from both jurisdictions, including the Somaliland Ministry of Trade and Tourism and Ministry of Transport and Roads Development, customs and revenue authorities, immigration, transport and roads authorities, regional and municipal administration, land administration, standards and inspection agencies, port and corridor authorities, and trader and transporter associations. The Technical Working Group provides technical direction and is advisory.

Contractual acceptance of deliverables and authority to instruct the Consultant rest with TMA alone. Government sign-off and endorsement are obtained by TMA through the Joint Steering Committee and are not a separate contractual instruction to the Consultant.

The Consultant shall submit brief monthly progress reports covering activities completed, deliverable status against programme, updated risk and dependency register, data outstanding and its consequences, stakeholder engagement undertaken, and level of effort expended against plan.

11. DURATION OF THE ASSIGNMENT

The assignment shall be completed within six (6) months from the date of contract signature. This period includes the TMA review periods provided at Section 8.1, and the Consultant shall programme accordingly.

The assignment involves desk-based analysis and field work. The Consultant shall allow for a minimum of two (2) field missions to Tog Wajaale and shall state the duration, composition and purpose of each in the work plan. The work plan shall be presented as a bar chart showing activities, deliverables, review periods, field missions, workshops and the critical path.

The Consultant shall demonstrate that the proposed staffing plan provides sufficient continuity of key personnel throughout the six-month assignment and shall identify any planned periods of reduced or increased mobilisation.

12. CONTRACT TYPE AND FINANCIAL PROPOSAL

- The contract shall be a lump sum, output-based contract. Payment shall be made against accepted deliverables in accordance with Section 8.
- The financial proposal shall be presented in United States Dollars and shall be all-inclusive of professional fees, travel, subsistence, surveys, enumerators, workshop logistics, insurance,

security, communications and all other costs necessary to deliver the scope, save for those items expressly stated to be borne by TMA.

- Bidders shall state the treatment of taxes, including value added tax and withholding tax in each jurisdiction of performance, and shall identify any tax assumed to be exempt or reimbursable. Bidders shall state any assumption made regarding foreign exchange availability and the currency of payment.
- The financial proposal shall include a breakdown by expert of person-days by task, and a breakdown of reimbursable costs, to permit assessment of realism. The indicative level of effort for the assignment is in the order of twenty to twenty-four (20–24) person-months; this is guidance only and bidders remain responsible for proposing the effort necessary to deliver the scope.
- No budget ceiling is disclosed. Proposals assessed as materially under-resourced against the stated scope may be rejected as non-responsive, with reasons recorded.

13. FIRM ELIGIBILITY — PASS OR FAIL

The following requirements are mandatory. Proposals not meeting every requirement shall be rejected without further evaluation and shall not attract merit points.

- Where a joint venture or consortium is proposed, a signed joint venture agreement or letter of intent identifying the lead member, who shall bear full and joint responsibility for delivery.
- All key personnel proposed shall meet the stated minimum qualification and experience requirements at Section 14.

Horn of Africa experience, and prior experience of engaging Government of Somaliland institutions, are scored rather than mandatory. Subcontracting of more than thirty per cent (30%) of the contract value requires TMA's prior written consent. Partnership with a firm established in Ethiopia or Somaliland is encouraged and is reflected in the evaluation criteria.

14. KEY PERSONNEL

The following key experts are required. Curricula vitae shall be signed by the individual, shall not exceed four (4) pages, and shall state availability and committed input in person-days. Key personnel shall not be substituted after award without TMA's prior written consent and only by a replacement of equal or better qualification; unapproved substitution is a breach of contract. - The Consultant shall report any safeguarding or PSEAH concern arising in the course of the assignment to TMA immediately in accordance with those policies.

Any consequent adjustment to time or price shall be agreed in writing before the affected work proceeds.

PART II

Section 6. Conditions of Contract and Contract Forms

Notes

1. Part II includes two types of standard Contract forms for Consulting Services (a Time-Based Contract and a Lump-Sum Contract).
2. **Time-Based Contract.** This type of contract is appropriate when it is difficult to define or fix the scope and the duration of the services, either because they are related to activities carried out by others for which the completion period may vary, or because the input of the consultants required for attaining the objectives of the assignment is difficult to assess. An example could be supervision of works. In time-based contracts, the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is determined on the basis of the time actually spent by the Consultant in carrying out the Services and is based on (i) agreed upon unit rates for the Consultant's experts multiplied by the actual time spent by the experts in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of contract requires the Client to closely supervise the Consultant and to be involved in the daily execution of the assignment.
3. **Lump-Sum Contract.** This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as reports, architectural designs, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Nevertheless, quality control of the Consultant's outputs by the Client is paramount.
4. The templates are designed for use in assignments with consulting firms and shall not be used for contracting of individual experts. Based on the kind of consulting services, the Client shall select the most appropriate type of contract to use. In some cases, the two types of contracts may be used at once; for example, in design and construction supervision assignments, the lumpsum type of contract is signed for the design stage and the time based contract for the construction supervision stage with the same consultant, both of which are signed at the same time.

Preamble

TradeMark Africa (TMA), formerly TradeMark East Africa, is a leading African Aid-for-Trade organisation that was established in 2010, with the aim of growing intra-African trade and increasing Africa's share in global trade, while helping make trade more pro-poor and more environmentally sustainable.

TMA operates on a not-for-profit basis and is funded by Belgium, the Bill and Melinda Gates Foundation, Canada, Denmark, the European Union, Finland, France, Ireland, the MasterCard Foundation, the Netherlands, Norway and the United Kingdom. TMA works closely with regional and continental inter-governmental organisations, national Governments, the private sector and civil society. Since its inception, TMA has delivered substantial gains for trade and regional economic integration in East Africa and the Horn of Africa, including a reduction of 16.5% in cargo transit times on the Northern Corridor from Mombasa to Bujumbura, and a reduction of an average of 70% in the time taken to cross selected one-stop border posts. TMA officially launched its continental-wide shift and rebrand in West Africa in January 2023, with Ghana being the first country of operations in the region.

In 2022, TMA established Trade Catalyst Africa (TCA), a catalytic finance company that pilots commercially viable projects for creating trade infrastructure, both physical and digital, and increasing access to Trade Finance for Small and Medium Enterprises. TCA's and TMA's headquarters are in Nairobi, Kenya. TMA maintains offices at the EAC Secretariat in Arusha, and in Burundi, the Democratic Republic of Congo, Djibouti, Ethiopia, Ghana, Malawi, Rwanda, Somaliland, Tanzania and Uganda, with operations in Mozambique, South Sudan and Zambia. Overview

- a) TMA's success depends on its reputation, integrity, openness, and respect for others. The trust and confidence of those with whom we deal is therefore essential. We treat our stakeholders with respect, honesty and fairness. We recognise our obligations to all those with whom we have a direct relationship such as donors, staff, service providers, contractors and suppliers, the private sector in general, governments, civil society and the wider community.
- b) This TMA Supplier Code of Conduct ("the Code") sets out the minimum requirements and standards expected from all suppliers, tenderers, and sub-contractors, when delivering projects and programmes. The Code covers areas that are central to a procurement and supply process such as value for money and governance, ethical behaviour and transparency, delivery chain management, observance of human rights, environmental and social safeguarding, organised crime, and security. It also covers employment of forced and/or child labour, fraud and corruption, gifts and hospitality. The Code replaces the previous Code of Ethics, Fair Price declaration, the Anti-Terrorism and Anti-Organised Crime declarations that all TMA suppliers were required to sign.
- c) Furthermore, the Code sets out the overarching principles for tenderers, suppliers and sub-contractors when doing business with TMA requiring them to:
 - Act responsibly and with integrity;

- Be transparent and accountable;
 - Seek to improve value for money; and
 - Demonstrate commitment to poverty reduction and TMA priorities.
- d) TMA requires that all tenderers, suppliers and sub-contractors, along with their respective staff, comply with the requirements and standards contained in the Code as applicable.
- e) Failure by a tenderer, supplier and/or their sub-contractors to comply with the provisions of the Code may disqualify and/or debar the supplier and/or sub-contractor from being eligible for TMA contracts and may result in a contract being terminated.
- f) For each separate procurement process, each tenderer must initial each page and sign the final page of the Code to signify that they have read, understood, will comply with, and will put into practice the content of the Code.
- g) In signing the Code, tenderers and suppliers accept that TMA or its appointed agents may undertake any checks it deems fit to ensure all reasonable measures have been taken to achieve compliance with the Code.
- h) TMA aims to create a culture in which it is normal for suppliers to 'do the right thing' and to voice genuinely held concerns about behaviour or decisions that they perceive to be unethical. Any concerns should be directed to TMA's independent whistleblowing channels as described in this document, and/or to the whistleblowing mechanisms of any of TMA's donors, the contact details of which can be found on their respective official websites.
